PHILADELPHIA, JANUARY 2, 1932.

MARKET CONDITIONS: There have been very few changes in values during the past month, so far as concerns the important field seed items. If anything, the tendency has been toward somewhat higher prices and this is very significant in view of general weakness prevailing in other mercantile lines.

RED CLOVER AND ALSYKE: Market about unchanged. Kindly note our Midwestern grown Red Clover is tagged, showing state of origin. The purity of Quaker brand Red Clover and Alsyke this coming Spring will be the highest in years. This has been brought about by careful selecting of original seed and by continued improvements and refinements in cleaning processes by which the Quaker standard is maintained

WHITE SWEET CLOVER: Market strong. Our stocks are Dakota grown and of the finest quality.

ALFALFA: The latest reports from producing sections indicate that quantity of seed remaining in farmers' hands has been reduced very sharply during the past few weeks. In view of the short crop it would not be at all surprising to see higher prices on Alfalfa a little later. Grimm Alfalfa is very attractive at present. Note quotations below on finest quality in officially sealed bags.

SOYBEANS AND COWPEAS: Write for market report covering the various varieties and quoting on recleaned quality for Spring shipment.

Prices quoted below are today's values f.o.b. Philadelphia. Samples sent promptly upon request. Bags not returnable. Upon request we can supply our seeds packed in 1 bu. bags made of towelling material of first quality. Each bag will make two single towels or one double towel. Seed so packed is invoiced at an advance of 50 cts. per 100 lbs., net weight, bags free

CLOVERS

ALFALFA

The records of origin for Alfalfa seed sold by us are kept in accordance with a plan approved by the U. S. Department of Agriculture and are maintained under the supervision of that Department. Under this system

60 LBS. PER BU.

and by special arrangement with that Department we are authorized to issueverified-origin seed certificates for such seed, the locality of production of which has been verified by a Federal seed inspector.

(5) LAWN MIXTURES

REG. U.S. PAT. OFF. (Freight Paid)

Old English Lawn Seed

For many years paramount among well balanced lawn mixtures, combining the three important features: namely, quick results, beautiful turf and permaney. The formula embraces a blend of grasses thriving in practically all localities and under average conditions. The slower germinating seeds of the more permanent grasses are protected by the quick growing, temporary grasses. The dwarf growing white clover acts as a natural fertilizer. After the permanent grasses become established the "nurse" strains are crowded out and a permanent turf is obtained. This is the grade you should recommend and urge your customers to use. The use of Old English Lawn Seed will make customers of occasional buyers and friends of regular customers.

	6.6	1	64	* 6					12.50

Old English Evergreen

The grasses making up this mixture are Kentucky Bluegrass, Redtop and White Clover. The formula used has been recommend by the Department of Agriculture for years. These grasses make a permanent, close knit turf under favorable conditions, but without the quick growing nurse grasses used in the better known Oto English grade, a quick growth must not be expected. Where quick growth is not an important factor, this mixture may be recommended to make a lawn of superfine beauty.

Pa	cked	5 lb.	44	28 00

Old English Shady Spot

A genuine shady spot mixture made up of Poa Trivialis. New Zealand Fescue and Redtop. Cheaper grasses not tolerant to shade are not used. Our formulae are rigidly adhered to. A densely shaded area under trees, a cool north side of a building, or an areaway need not be bare of grass. Shady Spot will produce a good turf under these unfavorable conditions.

Old English Products

TURF BUILDER

A complete food for lawns and golf courses Some of the ingredients are quickly available, some slowly available. Old Endish Turf Builder stimulates normal, deep rooted turf development aiding quick recovery from wear and tear and insect attack, Builds resistance to drought. Contains the three necessary elements of plant food. Contains tankage, making nitrogen available in a form not supplied in most of the advertised fertilizers made solely of chemicals.

100% Fertilizer--No Filler!

6% Nitrogen, 8% Available Phosphoric Acid, 4% Potash.

i i cigiit i aiu	

BONE MEAL

A fine ground high-grade plant food, with very high phosphorous content, and containing some nitrogen. Not quickly effective as in the case of our Turf Builder, nor is bone meal a complete plant food, but may be used to advantage along with Turf Builder, fertilizer and sheep manure. May be applied at any season of the year without "watering in," with no scalding or adverse or residaul effects, and to secure early and full maturity of blooms in flower gardens outdoors and in conservatories.

100 lb. paper lined bags.
